

“The PooPrints program has allowed us to take the new revenue and put it back into the community.”

PROPERTY MANAGER | GREYSTONE SUMMIT

Cleaner, More Profitable Properties

PooPrints helps properties hold their dog-owning residents accountable using DNA-matching technology, saving time and money on maintenance costs, providing a new revenue stream, and improving resident satisfaction.

Drive Revenue

Generate ancillary income through registrations and violation fines

Improve Resident Satisfaction

Increase positive reviews and renewals

Increase Productivity

Boost onsite teams' productivity, job satisfaction, and retention rates

Onsite Teams Supported Every Step of the Way

PooPrints provides everything onsite teams need to get started, and keep communities free of pet waste, including:

- Access to free training and support from PooPrints' implementation specialists
- Test kits
- Resident notification templates
- Example pet policy addendum

How it Works

Pet Registration Residents register their dogs using a DNA cheek swab. All PooPrints dogs will have an ID tag, making it easy to spot unregistered pets.

Collect Samples Onsite teams use PooPrints' waste collection kit when there's a violation.

Sample Processing PooPrints' DNA lab analyzes collected samples and identifies violators using DNA matching.

Hold Pet Owners Accountable With a confirmed DNA match, properties can hold pet owners accountable with a pet waste fine.

"Unscooped pet waste goes beyond being an inconvenience, it poses a genuine health hazard and significantly decreases resident and team member satisfaction. We're obligated to meet the expectations of our residents and deliver an outstanding living experience while supporting our onsite teams' job satisfaction. When a community is littered with pet waste, it's difficult to stay true to that mission."

- Mary Kahl, Senior Vice President, Timberland Partners
